RAG Knowledge Base — Source Links Catalog

A standalone, self-contained list of every source URL decided on for Feature A's knowledge base, organized by trust tier. This exists so the fetch step of the offline ingestion pipeline (or anyone reviewing sources) doesn't need to cross-reference the longer RAG Data Source Strategy document just to get the URL list.

July 2026 | Source catalog | Companion to the RAG Data Source Strategy document

Before first use: verify each URL still resolves — ZATCA pages can move. This catalog was correct as of research time (July 2026) but was not re-verified at build time. See open-decision item 3 in the Feature A Implementation Handoff.

Tier 1 — ZATCA Official (to ingest)
